Tracy Calhoun, a longtime nurse, shares her heart-melting memoir of working alongside JJ, the Therapy Dog, the brightest and most intuitive dog Tracy has ever trained. When not mooching dog treats, JJ is dedicated to helping humans cope with tragedy and loss through love and hugs. Tracy Calhoun, a nurse on staff at Samaritan Evergreen Hospice House in Oregon, paused at the bedside of an elderly patient in a coma. The woman had no family or friends, but the hospice team had learned she liked dogs, so Tracy put her Golden Retriever, JJ, a staff “therapist,” on the woman’s bed. JJ snuggled up, nuzzled a motionless hand, and then settled in, letting her body warmth cuddle and comfort the patient in her final hours. The woman, who had been unresponsive for days, then performed her final, intentional act. She stroked JJ’s head. Tracy recorded the intimate moment on her phone, then uploaded it to Facebook where she was keeping a modest account for friends, family, and community members who knew her and JJ. In August 2015, that video went viral, and was rapidly seen by tens of millions of viewers worldwide. To Tracy, it was a turning point in her mission to explain to a wider audience the joy that therapy dogs provide, and to do it with humor and canine chaos, as only a dog obsessed with bacon, puppies, and swimming can. Along the way, Tracy’s own story has grown and changed through her love of animals, and she’s found, in difficult times, she has needed the same comfort her pups offer to patients—for herself. “These stories of an unforgettable and deeply intuitive Golden Retriever named JJ, as told by her fabulous handler Tracy, are shared with humor and heart. Many wonderful moments happen when working with therapy dogs and reading about JJ’s magic is an extraordinarily moving experience.” — Donna Frindt, Executive Director, Project Canine “An emotionally satisfying and entertaining collection of tales not only between a dog and her human, but between this remarkable soul in a Golden Retriever suit and dozens of people in crisis—from hospice care to school shootings.” —Janet Velanovsky, Owner, Kaizen Pet Training & Behavior “An inspiring memoir, JJ’s Journey illustrates the medical and spiritual benefits of the human-animal bond through JJ’s unwavering patience, love, and support for the hospice patients and their grieving families. JJ’s Journey brings to

light that in our greatest time of need, every person can feel they are loved, honored, and mean something in this world thanks to the unconditional love that comes so naturally from a therapy dog's heart." —Colby Webb, Founder, Sav-a-Bull Rescue and author of Forty One Pit Bulls

How to Make Your Car Handle

Following a deadly car crash, small-town lawyer Lance Cooper risked everything to battle one of the most powerful auto corporations in the world to get justice for a young woman. A fast-paced, journalistic account of tragedy turned to triumph, despair to hope, *Cobalt Cover-Up* is an inspirational, thoroughly compelling, and victorious read. In the midst of his own family struggles, small-town Georgia lawyer Lance Cooper agreed to defend Ken and Beth Melton and investigate the deadly accident that killed their daughter Brooke after she inexplicably lost control of her Chevy Cobalt. But what started as a heartbreaking yet all too common lawsuit quickly escalated into a David vs. Goliath case when Cooper discovered shocking evidence that General Motors concealed an ignition switch defect for nearly a decade--resulting in 124 deaths, including Brooke's, and risking the lives of millions more. Despite GM's settlement offers and attempts to bury evidence, Cooper refused to back down and worked tirelessly to expose the truth. Locked in a tenacious legal fight, Cooper and the Meltons faced incredible odds--Ken and Beth losing jobs and suffering the difficulty of grieving a beloved daughter during a court battle, Cooper risking his reputation and private practice against the overwhelming opposition from GM's team of lawyers, and both parties facing massive financial strain. Yet, in the relentless pursuit for justice and to protect future innocent lives, this small-town lawyer and a working-class American couple

stared down the biggest US auto manufacturing mogul and ultimately transformed the entire industry.

The Design of Implicit Interactions

In this brash and audacious debunking of the myths and manipulation that brought the world to oil addiction, alt fuel expert Marc J. Rauch brilliantly lays out how ethanol can change the planet for the better--and along the way helps us navigate the noise of petroleum advocates. The Ethanol Papers is a rough-and-tumble, no holds-barred crystallization of the ethanol vs. gasoline conflict. Written in plain jargon, non-scientists, non-academics, and politicians alike will find it compelling. Yet this is no "Idiots Guide to Biofuels" or "Alt Fuels for Dummies." Rather, The Ethanol Papers is the most in-depth and complete explanation of the ethanol-oil problem now available, targeted for smart people who demand facts.

The Right Stuff

People rely on implicit interaction in their everyday interactions with one another to exchange queries, offers, responses, and feedback without explicit communication. A look with the eyes, a wave of the hand, the lift of the door handle—small moves can do a lot to enable joint action with elegance and economy. This work puts forward a theory that these implicit patterns of interaction with one another drive our expectations of how we should interact with devices. I introduce the Implicit Interaction Framework as a tool to map out interaction trajectories, and we use these trajectories to better understand the interactions transpiring around us. By analyzing everyday implicit interactions for patterns and tactics, designers of interactive devices can better understand how to design interactions that work or to remedy interactions that fail. This book looks at the “smart,” “automatic,” and “interactive” devices that increasingly permeate our everyday lives—doors, switches, whiteboards—and provides a close reading of how we interact with them. These vignettes add to the growing body of research targeted at teasing out the factors at play in our interactions. I take a look at current research, which indicates that our reactions to interactions are social, even if the entities we are interacting with are not human. These research insights are applied to allow us to refine and improve interactive devices so that they work better in the context of our day-to-day lives. Finally this book looks to the future, and outlines considerations that need to be taken into account in prototyping and validating devices that employ implicit interaction.

2020 Tech Trend Report

This book looks at the link between voters and political party systems in Asian democracies, focusing on India, Indonesia, Korea and the Philippines. It discusses this link in terms of three distinct elements: the formation of voters preferences, the translation of preferences into votes, and the translation of votes into seats. The book goes on to discuss how far the general rules of political party systems and their underlying causal mechanisms such as strategic voting are apparent in these Asian democracies. In particular, it explores the extent to which electoral rules and social structural variables affect the process of transforming preferences into a political party system within the context of Asian politics. The extensive areas covered by the book overcome the traditional sub-regional division of Asia, namely, East, Southeast and South Asia.
