Weathering, Erosion, & Soil Test Study Guide Flashcards

Soil erosion occurs when natural forces, such as wind and water, act on the soil. Man can also cause soil erosion by such practices as tilling a farmer's field or the clearing of vegetation.

Weathering, Erosion, And Soil. Brooke B. • 62. cards. Weathering. the process by which rocks on or near Earth's surface break down and change. Erosion. The removal and transport of weathered materials from one location to another is called erosion. Weathering must take place before erosion.

Chapter 7: Weathering, Erosion and Soil | StudyHippo.com

Weathering and erosion are continuous processes that gradually change the natural environment over time. Weathering is the process of wearing down materials into sediment. Erosion occurs when this sediment is moved.

Weathering, Erosion, and Soil - Earth And Environmental

Describe types and processes of weathering and erosion. This section introduces you to weathering and erosion, both important parts of the rock cycle. You will learn how different rocks are weathered and eroded and the implications of this weathering. What You'll Learn to Do

Interlude B - A surface Veneer: Sediments and Soil What is weathering and erosion, how do they differ? Weathering and erosion are not the same thing: weathering is the breaking of rocks into smaller and smaller pieces called sediments; erosion is the movement of these sediments by water, ice, wind, or gravity to a new location. Be familiar with the different types of chemical (hydrolysis
