Taureans, ever wondered what the Sun-signs tell you about love and life? This unique anthology of poems for love and life relates directly to your Sun-sign, Taurus. If you were born between the 21st of April and the 21st of May, you will relate to many of the themes identified with your sign's characteristics and personality traits. The poems in this collection have been chosen because they reflect a Taurean attitude to life. They appeal to the interests 'ruled' by your sign; the animals, flowers, trees, plants and places celebrated by the poets and associated with the sign of Taurus over three thousand years of traditional astrology. Some have been chosen simply because we believe you will enjoy them, and that they will awaken or re-awaken your love of poetry.

Ways of the World

Explore world history in a brief, balanced, highly readable overview that examines common challenges and experiences that unite the human past and identify key

global regional patterns over time with THE ESSENTIAL WORLD HISTORY. This brief overview of world history covers political, economic, social, religious, intellectual, cultural, and military history integrated into a chronologically ordered synthesis to help you gain an appreciation and understanding of the distinctive character and development of individual cultures in society. You can use the book's global approach and its emphasis on analytical comparisons between cultures to link events together in a broad comparative and global framework that places the contemporary world in a more meaningful historical context. Radiochemistry or Nuclear Chemistry is the study of radiation from an atomic or molecular perspective, including elemental transformation and reaction effects, as well as physical, health and medical properties. This revised edition of one of the earliest and best known books on the subject has been updated to bring into teaching the latest developments in research and the current hot topics in the field. In order to further enhance the functionality of this text, the authors have added numerous teaching aids that include an interactive website that features testing, examples in MathCAD with variable quantities and options, hotlinks to relevant text sections from the book, and online self-grading texts. As in the previous edition, readers can closely follow the structure of the chapters from the broad introduction through the more in depth descriptions of radiochemistry then nuclear radiation chemistry and finally the guide to nuclear energy (including energy production, fuel cycle, and waste management). New edition of a well-known, respected text in the specialized field of nuclear/radiochemistry Includes an interactive website with testing and evaluation modules based on exercises in the book Suitable for both radiochemistry and nuclear chemistry courses

Iowa Journal of History

Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

The Declaration of the Rights of Women

Olympe de Gouges was the most important fighter for women's rights you've never heard of. An activist and writer in revolutionary Paris, she published 'The Declaration of the Rights of Women' in 1791, and was beheaded two years later, her articulate demands for equality proving too much for their time. Over one hundred and fifty years later, the key statements of her declaration were internationally endorsed by the United Nations in its Declaration on the Elimination of Discrimination Against Women, which in turn went on to be legally recognized

by nearly every country in the world. This volume presents both of these key texts along with enlightening and inspiring commentary from a host of powerful women, from Virginia Woolf to Hillary Clinton.

The New Larned History for Ready Reference, Reading and Research

Are all film stars linked to Kevin Bacon? Why do the stock markets rise and fall sharply on the strength of a vague rumour? How does gossip spread so quickly? Are we all related through six degrees of separation? There is a growing awareness of the complex networks that pervade modern society. We see them in the rapid growth of the Internet, the ease of global communication, the swift spread of news and information, and in the way epidemics and financial crises develop with startling speed and intensity. This introductory book on the new science of networks takes an interdisciplinary approach, using economics, sociology, computing, information science and applied mathematics to address fundamental questions about the links that connect us, and the ways that our decisions can have consequences for others.

This book is the first complete commentary on Marx's manuscripts of 1861-63, works that guide our understanding of fundamental concepts such as 'surplus-value' and 'production price'. The recent publication of Marx's writings in their entirety has been a seminal event in Marxian scholarship. The hitherto unknown second draft of Volume 1 and first draft of Volume 3 of Capital, both published in the Manuscripts of 1861-63, now provide an important intermediate link between the Grundrisse and the final published editions of Capital. In this book, Enrique Dussel, one of the most original Marxist philosophers in the world today, provides an authoritative and detailed commentary on the manuscripts of 1861-63. The main points which Dussel emphasises in this path-breaking work are: The fundamental category in Marx's theory is 'living labour' which exists outside of capital and which capital must subsume in order to produce surplus-value Theories of Surplus Value is not a historical survey of previous theories, but rather a 'critical confrontation' through which Marx developed new categories for his own theory The most important new categories developed in this manuscript are related to the 'forms of appearance' of surplus value. The final part of the book discusses the relevance of the Manuscripts of 1861-63 to contemporary global capitalism, especially to the continuing underdevelopment and extreme poverty of Latin America.

Kabbalah For Dummies presents a balanced perspective of Kabbalah as an “umbrella” for a complex assemblage of mystical Jewish teachings and codification techniques. Kabbalah For Dummies also shows how Kabbalah simultaneously presents an approach to the study of text, the performance of ritual and the experience of worship, as well as how the reader can apply its teaching to everyday life.

The Cyclopedic Review of Current History

History of Philosophy

The Essential World History, Volume II: Since 1500

This hugely influential work marked a turning point in US history and culture, arguing that the nation’s expansion into the Great West was directly linked to its unique spirit: a rugged individualism forged at the juncture between civilization and wilderness, which – for better or worse – lies at the heart of American identity today. Throughout history, some books have changed the world. They have transformed the way we see ourselves – and each other. They have inspired debate, dissent, war and revolution. They have enlightened, outraged, provoked and comforted. They have enriched lives – and destroyed them. Now Penguin brings you the works of the great thinkers, pioneers, radicals and visionaries whose ideas shook civilization and helped make us who we are.
