E-Technologies: Innovation in an Open World

Banking Regulation and World Trade Law concerns the legal aspects of the interaction between banking regulation and international trade in financial services. The author studies the internal banking market of the European Union, the liberalisation of financial services trade in the World Trade Organization, the accords of the Basel Committee on Banking Supervision and the European Central Bank. The book focuses on the balancing between banking regulation and international trade law. It discusses discrimination and proportionality in national banking regulation, the allocation of prudential regulation and supervision between home and host country, and international financial law-making. The author questions decentralised/nation-based banking regulation and supervision as a foundation for a sustainable liberalisation of international trade in financial services. The book considers various reforms of the international financial architecture, such as the incorporation of the Basel processes and accords into the WTO system, and the setting up of new international institutions by building on the Basel Committees or the IMF structures. The role of central banking in designing the international financial architecture is also explored: the book reviews the ECB's competence over foreign exchange policy and its function as lender of last resort, and treats price stability, banking soundness and representation as critical concepts. The analysis also reveals that the concept of 'prudential', despite its extensive use in banking regulation, has not been defined with adequate precision. In seeking to delineate the interface between international economic law and banking regulation, Dr Panourgias builds on the rich European scholarship on institutional financial issues and the US interdisciplinary approach to world trade law. He also entertains the notion of international financial law as a distinct field. The book will be of particular interest to those concerned with financial law and international banking.

The Norton Anthology of World Literature

In *The World in the Shadow of God*, Ephraim Radner argues for a vigorous Christian natural theology and insists that such a theology must, of necessity, be performed poetically. The peculiar character of such a theology is found in its disclosing of the natural limits that indicate indirectly the impinging and more fundamental reality of the divine life. Natural theology represents the encounter between created reality and the "shadow" of God's creative and revelatory grace. However, the

encounter is a morally demanding task for the Christian church if it is to be held accountable to the truth on which its life is based. The first portion of the book offers an extended critical essay on the nature of this sort of natural theology, while the second provides a developed set of examples through poems that display the natural world in light of the truths articulated in the Apostles' Creed. Those interested in the intersection of theology, literature, history, and the natural world will be challenged by this attempt to renew a basic element of Christian knowledge and culture.

The Law and Policy of the World Trade Organization

Wherever we look today, popular culture greets us with “texts” that make implicit arguments; this book helps students to think and write critically about these texts. The World Is a Text teaches critical reading, writing, and argument in the context of pop-culture and visual examples, showing students how to “read” everyday objects and visual texts with basic semiotics. The book shows how texts of all kinds, from a painting to a university building to a pair of sneakers, make complex arguments through their use of signs and symbols, and shows students how to make these arguments in their own essays. This new edition is rich with images, real-world examples, writing and discussion prompts, and examples of academic and student writing. The first part of the book is a rhetoric covering argumentation, research, the writing process, and adapting from high-school to college writing, while the second part explores writing about specific cultural topics. Notes,

instruction, and advice about research are woven into the text, with research instruction closely tied to the topic being discussed. New to the updated compact edition are chapters on fashion, sports, and nature and the environment.

INSTANT NEW YORK TIMES BESTSELLER "One of the most important books I've ever read—an indispensable guide to thinking clearly about the world." - Bill Gates
"Hans Rosling tells the story of 'the secret silent miracle of human progress' as only he can. But Factfulness does much more than that. It also explains why progress is so often secret and silent and teaches readers how to see it clearly."
—Melinda Gates "Factfulness by Hans Rosling, an outstanding international public health expert, is a hopeful book about the potential for human progress when we work off facts rather than our inherent biases." - Former U.S. President Barack Obama
Factfulness: The stress-reducing habit of only carrying opinions for which you have strong supporting facts. When asked simple questions about global trends—what percentage of the world's population live in poverty; why the world's population is increasing; how many girls finish school—we systematically get the answers wrong. So wrong that a chimpanzee choosing answers at random will consistently outguess teachers, journalists, Nobel laureates, and investment bankers. In Factfulness, Professor of International Health and global TED

phenomenon Hans Rosling, together with his two long-time collaborators, Anna and Ola, offers a radical new explanation of why this happens. They reveal the ten instincts that distort our perspective—from our tendency to divide the world into two camps (usually some version of us and them) to the way we consume media (where fear rules) to how we perceive progress (believing that most things are getting worse). Our problem is that we don't know what we don't know, and even our guesses are informed by unconscious and predictable biases. It turns out that the world, for all its imperfections, is in a much better state than we might think. That doesn't mean there aren't real concerns. But when we worry about everything all the time instead of embracing a worldview based on facts, we can lose our ability to focus on the things that threaten us most. Inspiring and revelatory, filled with lively anecdotes and moving stories, *Factfulness* is an urgent and essential book that will change the way you see the world and empower you to respond to the crises and opportunities of the future. --- "This book is my last battle in my life-long mission to fight devastating ignorance. Previously I armed myself with huge data sets, eye-opening software, an energetic learning style and a Swedish bayonet for sword-swallowing. It wasn't enough. But I hope this book will be." Hans Rosling, February 2017.

“His ideas will help anyone who has the courage to understand that a real education must go beyond filling in circles on a standardized test form.” —Rafe Esquith, New York Times-bestselling author of *Teach Like Your Hair’s on Fire* Can playing a game lead to world peace? If it’s John Hunter’s *World Peace Game*, it just might. In Hunter’s classroom, students take on the roles of presidents, tribal leaders, diplomats, and military commanders. Through battles and negotiations, standoffs and summits, they strive to resolve a sequence of many-layered, interconnected scenarios, from nuclear proliferation to tribal warfare. Now, Hunter shares inspiring stories from over thirty years of teaching the *World Peace Game*, revealing the principles of successful collaboration that people of any age can apply. He offers not only a forward-thinking report from the frontlines of American education, but also a generous blueprint for a world that bends toward cooperation rather than conflict. In this deeply hopeful book, a visionary educator shows us what the future of education can be. “The *World Peace Game* devised by fourth-grade teacher Hunter has spread from a classroom in 1978 to a documentary, a TED Talk, the Pentagon, and now finally a book, in which he describes the ways his students have solved political and ecological crises that still loom large in the world of adults . . . Hunter’s optimism is infectious.” —Publishers Weekly “Inspired, breath-of-fresh-air reading.” —Kirkus Reviews “Hunter proves the value of ‘slow teaching’ in this important, fascinating, highly readable resource for educators and parents alike.” —Booklist
